TENNESSEE ZOUAVES .- This corps is now nearly formed, and will go into camp during the coming week. All the companies that propose to enter it will report themselves to in this city at once. Col. ANGLADE may be found at the Western Military Institute, and Lt. Col. Thurston over the Post Office. It is desirable that the men should go into training as soon as convenient, and Companies already formed should report themselves immediately.

By a dispatch from Richmond, we learn that Lieut. J. R. DRAKE, of Capt. EARTHMAN'S Company, is on his way home.. and that during his stay here he will receive recruits for the Company. Those who may wish to go at once into active service are now offered an opportunity of doing so.

The virago of the Louisville Journal is spitting his venom at Gov. HARRIS, but it talls short of the object. He had better devote the remnant of an ill-spent life to doing penance for past sins.

We are requested to state that the Clothing referred to by the Military Board, for the Volunteers, means material enough for a suit, besides socks. The making will be done afterwards.

MORE GOOD NEWS-C. S. STEAMER SUNTER RAISES THE BLOCKADE.-The Tampa (Fla.,) Peninsula of the 3d inst., has the following We have been placed in possession of information which, if true, will produce a thril of gratitude throughout the South equal to that caused by the news of the great battle of Manassas, Messrs, D. Archer and H McLeod, who arrived at this place-the for mer on Sunday, and the latter on Wednesday-both bring intelligence that the C. S. steamer Sumter has, besides capturing seven prizes, (an account of which we publish elsewhere in to-day's paper) sunk the Federal war steamers Crusader, Mohawk and Wyandotte, and that among the prisoners taken is the infamous Capt. Craven, of the Crusa-

From the above it appears that that little C. S. steamer is creating quite a sensation among the Lincolnites on the Gulf. If she meets with the same success, during the ensuing six weeks, that she has since the time of departure from the Mississippi, John Bull will have been spared the trouble and responsibility of opening the avenue to our cotton depots. "Now, by St. Paul, the work goes

## The First Blood Spilled!

A gentleman who formed one of the body guard of Geo. W. Bridges, on his recent trip seross the Cumberland mountains, has re turned to Athens. He reports that Paul Mc-Dermott, Esq., a promising and popular young lawyer of that town, now a member of Captain Lowry's company, on service in Fen-tress county, was sent out a few days since as one of a sconting party. Late in the day his horse returned to the camp, without the rider. This excited alarm, and a squad was dispatched to ascertain his fate. Some distance from the encampment they saw in the road a quantity of blood, and evidences of a struggle. Reaching a cabin near by, they learned that McDermott had been attacked by three men, Lincolnites, and severely beaten, if not killed. He was tracked by his blood for some distance, but his body was not found up to the time this gentleman left, and but little doubt remains that he was cruelly

This news, as might be anticipated, created intense excitement in McMinn, where he was so well known and esteemed. In less than twenty-four hours after the news reached that county, more than 1,000 of the citizens met in Athens, and several bundred of them irrespective of past party differences, at once volunteered, and shouldered their rifles and muskets, and took up their line of march for Fentress, to ascertain the truth or falsity of the report, and if true, to avenge his death. This is the true spirit. The only safety the loyal citizens of East Tennessee have is in their own strong arms and brave hearts.

The honest masses are hourly taking side with the South, and showing a patriotic determination to defend their hearth stones from foreign or domestic violence. But the Lincoln leaders and those who blindly tollow them, are for a civil strife, and are sending out pilots to guide the Federal forces through the mountain passes. Unless more prompt market can always be found at the paper-mill measures are inaugurated, all the horrors of a civil war will be upon us in less than two weeks .- Knozville Register, 14th.

Mose Lincoln Guns.—Three more car loads, containing 3,000 Lincoln guns, arrived at Lexington Saturday night and were im mediately sent forward towards East Tennessee. Gen. Nelson, of Lincoln's army, Judge Bramlette, who has resigned his seat on the beach for the purpose of taking command of a Lincoln, regiment, and other agents of Lincoln, were in close consultation at Lexington on Sunday, and that afternoon proceeded to Nicholasville.—Lou Cou.

New Orleans, Aug. 12.—On Saturday, August 3d, the blockading schooner Dart exchanged five or six shots with the Confed-

erate batteries on Galveston Island, doing no damage on either side. The following Monday afternoon, the Federal steamer South Carolina left ber usual station and moved almost within rifle-shot of the batteries, which opened fire on the steam-er and was answered by the South Carolina, They exploded in the ai,r however, doing no material injury. A shell exploded among a number of lookers on, near the batteries, killing one and wounding two or three.

ne twelve or fourteen shots were ex changed, when the steamer withdrew.

It is believed that the South Carolina was strack in the side, and had had her pivot-gun

Message of Governor Sprague. On the assemblage of the Rhode Island Le gislature in special session on the 8th inst, Governor Sprague delivered the following

The Senators are aware of the object tha has called them together, both from the Pro-clamation which has been made and by events with which the whole country have become

When the action of this body was first to ken, the State and the country felt that the war would, from the necessities of the case, be of short duration. Since that time events have transpired which have opened the eyes of the whole country, to the magnitude of the shellion which they are called upon to crush out. The repulse which the army has recent y suffered has been owing to so many caus that it is impossible to attribute it to any on which we should regard as satisfactory,-all of them pointing to the condition of things which we now behold. The State and the which we now benold. The State and the country, however, may feel assured, from the change in the programme at Washington and by the people throughout the whole North, that the errors of the past will not be repeated in the future, and also that every movement for the future will hardly fail to result

The war will of necessity be a long one. We have been in error as to the strength of the enemy, and as to the long and persistent course which has been pursued by the South tending towards this point; while we have been occupied in our business they hav been creating revolution. We were under the impression that they were lacking in all the resources which go to raise and maintain armies. Whereas, in almost every particular, we have found them superior to ourselves. We have found not only the physique of their men equal to ours, but their clothing, their arms, their subsistence and their means of Col. J. G. Anglade, or Lieut. Col. Thurston transportation-everything that goes to make up military efficiency, superior to ours. And when we have been obliged to be the attacking force, marching under a Southern sun exhausted, without provisions and withou shelter, they have been encamped and in for tified positions in a country unfriendly to us and friendly to them, where they could receive information of every movement of ours and we could learn nothing whatever as to

The probabilities are that in no case on the record of the world's history has an army been called into the field possessing so little knowledge of the strength and position of the nemy; and such being the case, it was impossible for any troops in the position ours lound themselves, to have sustained themselves for any considerable length of time. It has opened the country to the immensity of this struggle, and in that view of the subect the result may be bearable. The troops of the North entering the field igninst those of the South have in every case occupying equal advantages been able to

drive them from the field; but protected by

superior position, by batteries and seperior torce, it has of course been impossible-atterly out of the question to atrempt to drive them from their strongholds. Such being the case, and the country calling upon the States for so much more than was at first anticipated, taxation by the general government and next by the State in creasing, I have been induced to call the legislature together to see whether they are willing to continue the liberal course which was inaugurated when this contest first be

A WEALTHY COMPANY .- The Point Coupee Artillery, Capt. R. A. Stewart, composed of one hundred men and horses, and six guns and six caisson carriages, reached this-city must state that I do not desire the position, yesterday. The company comprises planters, sons of planters, lawyers, doctors, etc., whose united possessions amount to fifteen million of dollars. These gentlemen desire only to be in the thickest of the fight, and we doubt not they will not belie their gallant name. They are at present encamped at the Fair Grounds, where they will remain until ordered elsewhere. - Memphis Avalanche.

A NEW MACHINE TO MAKE MINNIE BULLETS We have daily evidence in proof of the act that the war which the North is now waging against us is having a most beneficial effect in developing the inventive genious of our people. The latest thing to which our attention has been called is that of a machine for the manufacture of bullets by steam, in quantities large enough to supply n a tew weeks, the demands of the whole Confederate Army. This machine is the in-vention of two New Orleans mechanics, Messrs. McClintock & Watson, machinists No. 31 Front street. The process by which the cold lead is converted, either into Minnie bullets, round balls or slugs, by their machines, is at once so simple and expeditions that it challenges the admiration of all who see it. It will make over 1,000 bullets per hour, if run by steam, and perhaps half that number if run by hand power. As the balls are made by compression, they are of course more perfect than those moulded, and consequently they are more reliable for accurate shooting. Being perfectly true in their proportions, they do not require to be shot from a rifled gun, as the rifling of guns is principally useful to counterbalance defects in the projectile. We should be pleased to give a full and accurate description of this valuable is from a letter written from Liverpool on invention, but our lack of space torbids it We can assure our readers that a visit and a personal examination will well repay the trouble.- N. SENATE.

For Principal Clerk. FRANC M. PAUL, of Shelby.

WHEREAS, by the act of the General Assen bly passed May 6th, 1861, it is made the duty of the Governor "to raise, organize, and equip, a provisional force of Sfty-five thousand volunteers, twenty-five thousand of whom, or any less number which the wants of the service may demand, shall be fitted for the field at the earliest practicable moment and the remainder of which shall be held in reserve, ready to march at short notice;" and whereas the provisional force which has been organized, armed, equipped, and fitted for the field has been transferred to the service of the Confederate States; and whereas, the Presi- R. R. R. dent and Congress of the United States have been deaf to the promptings of justice, and notwithstanding their troops have been ingloriously defeated in their plans of subjugation by the intrepid valor of the South, have appropriated immense amounts of money and are bringing into the field large additional armaments to effect their purpose of overriding and trampling upon the rights and liberties of our people;

Now therefore, I, Isham G. Harris, Governor of the State of Tennessee, by virtue of the authority in me vested by the above recited act, do issue this, my proclamation, appealing to the patriotism of the people, to raise, organize, and thoroughly prepare a reserve force of thirty thousand volunteers, to be styled "the Reserve Corps of Tennessee," which shall be organized into companies, battalions, regiments and brigades, and mustered into the service of the State and held ready to march at short notice, but not put on pay or subsistence, or withdrawn from their ordinary vocations until the necessity for actual service shall arise, when they will be ordered out on duty and placed on the same footing of the other twelve months volunteers. Officers will be appointed to visit the respective counties, in which companies may be raised and organized, and muster them into service, after they shall have reported themselves by companies to the Adjutant-General. When thus mustered into service they will be required to drill by companies at least once a week, and by Battalions and Regiments as often as once a month, and when on duty, will be subject to the

rules and articles of war. . In witness whereof. I have hereunto L.S. set my hand and caused the great seal of the State to be affixed at the Executive office, in Nashville this, the 7th day of August, 1861.
